This project is funded
by the European Union

Session contents

- Tools for structuring lesson resources
- Tools for monitoring students performance
- Discussing Internet addiction and digital natives challenges

Tools for structuring lesson resources

<https://www.tes.com/lessons>

You can create lessons by dragging resources on a Structured order, including Texts, presentations, videos, sites, and activities and assign them to specific student groups

tes teach

QUICK START GUIDE

Create Digital Lessons
in 5 Minutes

Other lesson structuring resources

- **Nearpod** (very similar but with many payed features)
- **KanAcademy** (already structured video lessons and activities, several subjects, different languages)
- **Learning apps** (different activities, that can be arranged to build lessons)
- **Deck toys** (sets of contents and activities organized in path with gaming environment)

Tools for monitoring students performance

- **Mentimeter**

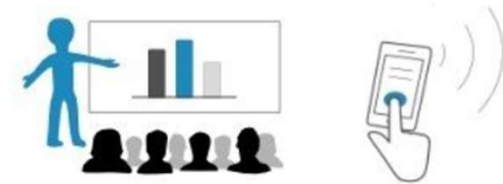

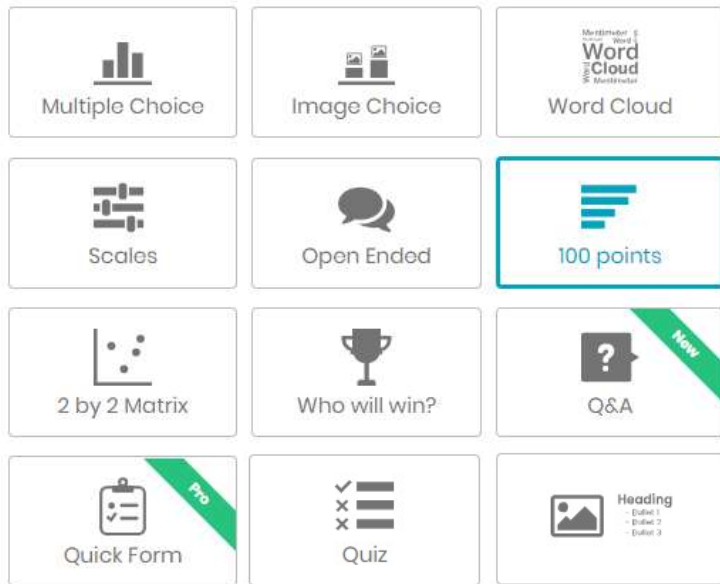

- Go to **www.menti.com** and use the code **35 51 0**
- Answer the following questions:
 - What are the reasons that most contribute to the non-use of ICT in the classroom?
 - What possible solutions would you suggest to overcome these issues?

Mentimeter

Tools for monitoring students performance

- **Mentimeter** is a web and native application to **interact with your audience.**

Socrative Evaluation Platform

<https://www.socrative.com/>

- Socrative is your classroom app with interactive activities for, classroom engagement.

Socrative Evaluation Platform

Individual activity:

1. Go to socrative website <https://www.socrative.com/>
2. Enter the classroom name **SERJUN2018**
3. Enter your name
4. Just 3 questions 😞
5. Enjoy!!

Click to see tutorial

Other tools for monitoring performance

- Slido (paid features)
- Wooclap (paid features)
- Pool everywhere (paid features)
- DirectPool
