History of our school

It is almost as old as Australia!

The permission to establish our school was issued in 1904, however the high school building was built in 1911.

Suspension of study

During the First World War, our school housed a military hospital and students took part in the fight for Poland's independence.

During the Second World War, a German police headquarters was established in our high school, then a German gymnasium and a military hospital.

Fortunately, our school building escaped the bombing.

The remnants of these events are walled-up rooms in the school basement. However, to this day it has not been possible to set whether something is hidden in them.

Patron of our school - Nicolaus Copernicus

Mikołaj Kopernik is our patron. He was an excellent astronomer and mathematician. He is the inventor of heliocentric theory and an author of *De Revolutionibus*. He was the true man of many talents, because besides his astronomical successes, he was a lawyer, a bishop and even a doctor.

We say "He had stopped the Sun and moved the Earth."

Also, he have probably invented the first sandwich.

Festivals we celebrate

- π Day
- The festival of Art and Science
- Earth Day
- Chemistry Day
- The Day of Native Language

π Day and Festival of Art and Science

Math-physics classes celebrate π Day. For a whole day they are competing in different categories including: best costume, logic run, recitation of decimal expansion of the letter π and many more. That day they chose the mathematician of the year and everyone have lots of fun.

At the Festival of Art and Science all students of our school attend lectures connected to their majors. Lectures are given by the professors of universities.

Chemistry Day and Earth Day

Biology - chemistry classes celebrate Chemistry Day. They compete in different categories and prepare videos or short scenes about chemistry topics.

Math - geography classes celebrate Earth Day. They compete in for example: ecology contest, the weirdest animals of the world contest and waste segregation.

Competitions

Our school cooperate with with 13 universities. Students take part in many competitions for priority place in universities incl. Jagiellonian University or AGH. Every year we have a lot of winners, especially in math.

Fields of study in our school

In Poland we go to highschool for 4 years. We can choose class, based on what we like or what we good at. Our school has 5 fields of study.

Humanities university class

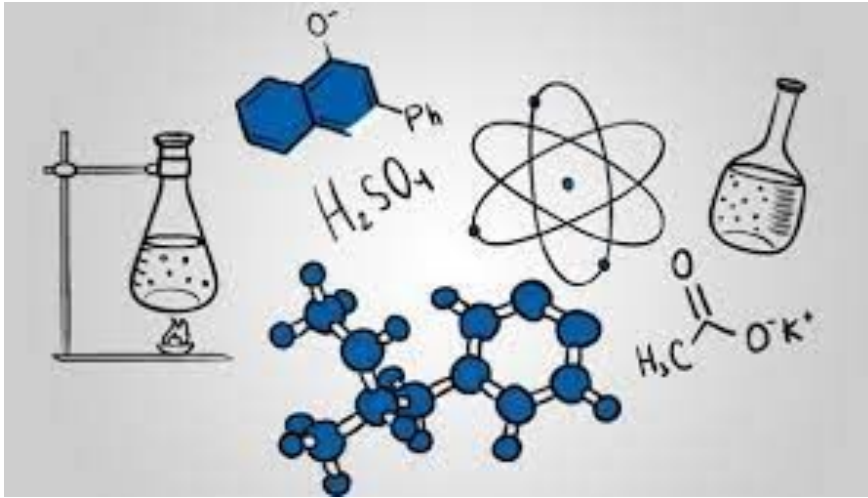

This class has main course in education with humanities subjects like polish language, history and english. It has extra lessons incl. polish language seminar or history seminar.

Mathematical university class

This class specialize in math, physics and english. Main subject is math and students take part in interesting extra subject like architectural drawings and math seminar.

Biological-chemical class

Third class in our school is biological-chemical class. Students in this class take part in lessons in laboratory and english language in medicine.

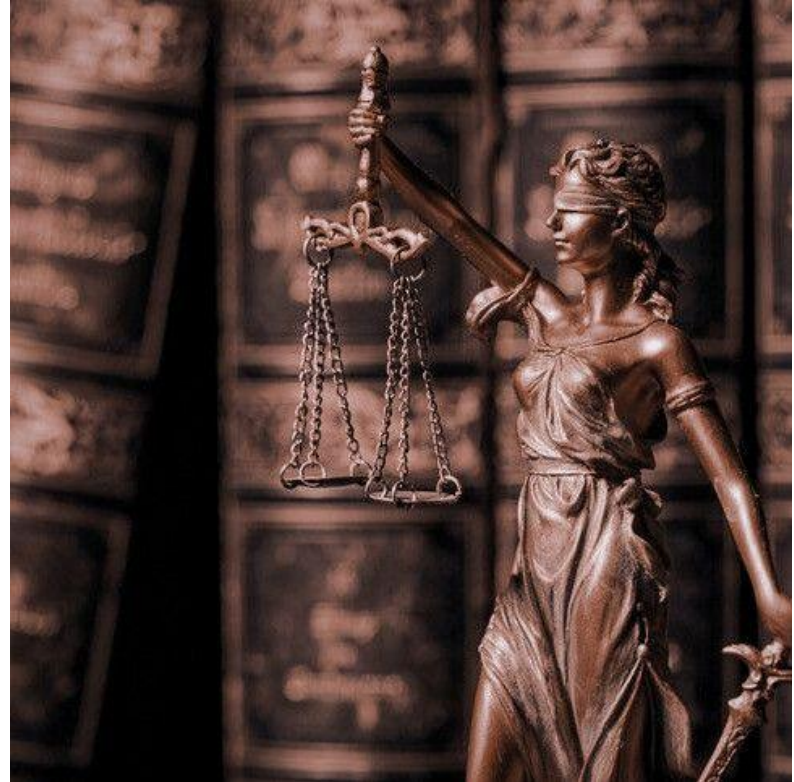

Math class with IB

This class have very unique course of education, because the main subject is english. However students are also learning math and geography, and because of that they have so many trips ;pp

Social science and media education class

Students in this class are learning a lot about society and polish culture and language. They have extra lessons like law education or media education.

WONDERFUL SCHOOL TRIPS

Our students are taking part in many interesting trips. Our school is giving us an opportunity to see the world. We visited Paris, Barcelona, Warsaw, Venice, Milano, Vienna and many more amazing European cities.

In september 2022
some of our students
went on a bus trip and
visited countries such
as France, Switzerland,
Spain and Italy. In
october another group
went on a trip to Paris.
In this year our
teachers have planned
a trips to Italy Scotland
and UK.

SCHOOL SPECIAL INTERESTS GROUPS

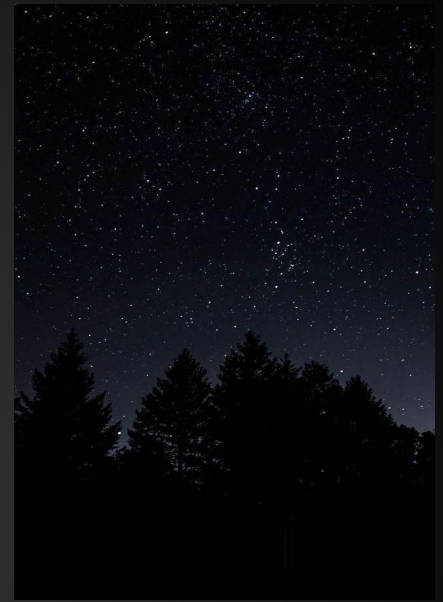

In our school we have got four main special interests groups: school vocal band, symphonic orchestra, theater group and astronomy club.

ASTRONOMY CLUB

One of the most active group in our school is astronomy club called LOŻA. Students which belong to this club are participating in many special events such as stargazing in Sopotnia Wielka, volunteering projects, sun observations and many more.

That's all about our school
